

Foundational course only
n = 14

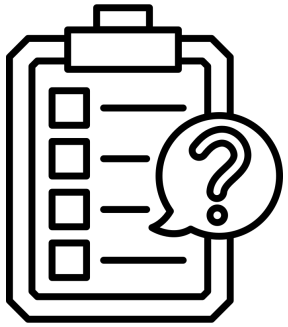

Foundational before advanced
n = 3

Foundational concurrent with advanced
n = 6

Advanced course only
n = 18

Methodology

1. Retrospective pre-/post-course ratings
2. Reflexive thematic analysis of open-ended responses

Anxiety

- Decreased in all groups from pre- to post-course
- Did not vary by group

Computational Skills

- Increased in all groups from pre- to post-course
- Significantly larger gain in "foundational only" vs. students who met R only in advanced coursework

Math Skills

- Increased in all groups from pre- to post-course
- Significantly smaller gain in "foundational only" vs. "advanced only"
